

DAN DAVIDSON FOUND

Well it might be the whiskey talking
Might be the wine
But I think that I found someone
I can settle down with
All my life
Once bitten and twice shy
I've been through the worst
Now I wanna make you mine

I've been wandering all alone
I've been broke down
I've been stoned
Walking in circle
Speaking in tongues
Laid my eyes upon you and I came undone

Won't you marry me in the back 40
By the rusted truck and the maple tree
A country house and a family
We can have that beautiful life

Well it might be the whiskey talking
Might be the wine
But I think that I found someone
I can settle down with
All my life
I've been running from the light
Only darkness til you came around
Now I've been found
I've been found

Left that heartache in the past
Hold you in my arms and we'll look back
and laugh

Won't you marry me in the back 40

By the rusted truck and the maple tree
A country house and a family
We can have that beautiful life

Well it might be the whiskey talking
Might be the wine
But I think that I found someone
I can settle down with
All my life
I've been running from the light
Only darkness til you come around
Now I've been found
I've been found

Would you marry me in the back 40
By the rusted truck and maple tree
A country house and a family
We can have that beautiful life

Well it might be the whiskey talking
Might be the wine
But I think that I found someone
I can settle down with
All my life
I've been running from the light
Only darkness til you came around
Now I've been found
I've been found

Well it might be the whiskey talking
Might be the wine
But I think that I found someone
I can settle down with
All my life
I've been through the worst
Now I wanna make you mine
