

NATIONA PARK RADIO THERE IS A FIRE

Come on let's go now, go for a ride
Let's bring our kids, bring our wives.
Down that road, they they call life,
Let's do something that makes us feel that we're alive.

Look out that window, look past your nose.
Can you recall the path you chose?
Those roads you passed by, you'll never know
That one you missed you'll never see just where it goes.

There is a fire, there is a fire
There is a fire and it's burning in my heart.
There is a fire, there is a fire,
There is a fire and it's burning in my heart.

Into the unknown, into the night
Don't let the fear, put out your light
If you believe it, then you just might
Realize that everything will be alright.

And if you ever, let go the doubt
Embrace the fire, don't put it out.
And if you need to, let out a shout
And show the world what life is really all about.
